(54) CONTROL METHOD OF FA SYSTEM

COPYRIGHT: (C)1998,JPO

(57) Abstract:

PROBLEM TO BE SOLVED: To control controlled equipments without requiring a special software from an optional place by reading file form data kept in the storage medium of the respective controlled equipment at the time of executing an operation as occasion demands.

SOLUTION: The inspecting program of an inspection equipment 1 generates the raw file of an inspection result and transfers it to an FA server 4. The FA server 4 converts the raw file into a www file by an automatic converting program for www and transmits it together with a menu file to a personal computer 3 by a www distribution program HTTP. The user of the personal computer 3 changes the contents of the file and FTP-transfers the raw file to the inspection equipment 1 by the FA server 4 and the inspection equipment 1 reads the raw file so as to execute the operation. The personal computer 3 connected to LAN 6 and the personal computer 10 connected to an internet 7 read and correct information of the inspection equipment 1 by CG1 with the FA server 4 by performing access to the FA server 4 with a www browser.
